Speed Symbols H, V, W and Y. 17 - 23 inch.

## PERFORMANCE CHARACTERISTICS

	1	2	3	4	5
DRY PERFORMANCE					
RIDE COMFORT					
TREAD LIFE					
OFFROAD TRACTION					

### OUTSIDE - CORNERING PERFORMANCE

Increased contact area through use of wide ribs with shallow and narrow groove to maintain good tread contact with the road.

Improved handling and high grip.

### INSIDE - AQUAPLANING & BRAKING

Two wide grooves ensure good water drainage.

Better braking achieved via a rib based pattern configuration, which increases the tread's rigidity in the back and forward directions.

### TREAD DESIGN - WIDE OUTER BLOCKS

Increased contact area through the use of wide blocks with shallow and narrow grooves to maintains good tread contact with the road.

Improved handling with responsive steering feel and high grip.

### BENEFITS

- 1.Enhanved Dry handling and Wet handling
- 2.Maintain confortable ride.
- 3.highway speed stability
