

ALTIMAX COMFORT

THE RELIABLE PARTNER

For compact- and middle-class-vehicles and MPVs.
A reliable partner for a comfortable quiet ride.

- **Shorter braking distance.**
Thanks to its wet grip compound with lateral sipes in the tread blocks, the Altimax Comfort displaces the water film, meaning that the tyre has excellent grip in wet conditions. This ensures shorter braking distances.
- **Very good steering response on wet roads and low risk of aquaplaning.**
On wet surfaces the rigid outer tread blocks and the inner shoulder blocks, which are connected by tie-bars, give the vehicle good stability. This means the steering performance always remains precise, even in wet conditions, and the risk of aquaplaning is minimised.
- **Low fuel consumption and high mileage.**
The new compound with the optimised rigidity of the rubber blocks minimises rolling resistance and heat generation. This keeps fuel consumption low and increases mileage.

Speed Index	Size	Rim Size	Series
T / H / V	135 - 215 mm	13" - 16"	60 - 80
